INTRODUCTIE

02

Matthew Van Haver

Laurens Van Haver

Dear angler,

Marcel Van Den Eynde nv is a family business that exists now for more than 50 years. Marcel, the founder of the company was a very well-known person and together with his groundbaits he became a real phenomenon in angling history.

What once started in Marcel Van Den Eynde's shed has now grown into a distribution network in every European country and several countries outside Europe, thanks to our many distributors, retailers and of course, our customers. The knowledge and commitment the company built up is still very important today. We have a strong team with great knowledge that assists us in the necessary developments within angling, for which we are very grateful.

Marcel's vision is and was that the company serves our family, a true family business. Since 2016, the third generation has started working in the company and each of us has his own strength that benefits the business. We may not share the same family name, but we do share the passion for angling and its products.

Matthew is an Agriculture and Biotechnologist and uses his knowledge to complete the paperwork with all the requirements today. Groundbaits for fishing today is a real challenge to be able/authorised to produce professionally. Fishing itself is none of his business, but from his education he is triggered why a product has to fulfil certain requirements and why certain products attract fish. Quality and consistency of ingredients is 1 of his biggest concerns within the company.

Laurens is the fisherman and mechanic within the company, so he primarily manages production. Laurens was Marcel's godchild and therefore inherited the special fishing skills. Laurens ensures that all products are guaranteed our (quality) label and that the production runs without any problems.

Since 2024, we have decided to expand the company by bringing a second brand under Marcel Van Den Eynde's name. The Belgian Carp brand **DREAMBAITS** was added to the range, a brand produced with the same passion and quality. This expansion provides a large-scale expansion of our range, allowing us to approach almost every branch of angling with products made within our production halls. This way, we can ensure the highest quality.

Below you can find some symbols, through this guideline we try to indicate what our baits can be used for. For a specific product description, please refer to our website.

We would like to wish you a fantastic fishing season!
